Day 001 | Unit 01 | Teacher plan

Positive Rational Numbers: Decimals and Division

Add Decimals with Place Value

Standards: 6.NS.B.3

Learning target: I can add decimals by aligning equal place values.

enVision Topic 1: Use Positive Rational Numbers | Spectrum companion Chapter 1

0–5 minutes / Launch

Read the target. Ask for an estimate or a sketch before calculating. Connect the new idea to the previous lesson.

5–17 / Model

Use Worked Example 1, then Example 2. Ask students to name the next step and explain a choice. Line up decimal points so tenths are under tenths and hundredths under hundredths. Add zeros if helpful. Add from right to left, regroup, and bring the decimal point straight down.

17–42 / Practice

Assign questions 1–10 in order. Use 1–3 for foundations, 4–7 for application, and 8–10 for state-format response and reasoning. The example button provides a separate question with a worked method.

42–50 / Discuss and check

Compare representations. Review a selected answer and a plausible error. Use question 10 as an exit discussion; ask students to check units, scale, or substitution.

Support and extension

Offer number lines, fraction strips, grid paper, or a table template as appropriate. Read multi-part directions one part at a time. For extension, ask for another representation or a counterexample.

Companion and state alignment

Use the matching skill in the edition you own. No unverified publisher page numbers are assigned. AASA references below identify related public sample items by standard and format; all course questions are original.

Day 001 | Unit 01 | Lesson

Positive Rational Numbers: Decimals and Division

Add Decimals with Place Value

Standards: 6.NS.B.3

Learning target: I can add decimals by aligning equal place values.

enVision Topic 1: Use Positive Rational Numbers | Spectrum companion Chapter 1

01 / Learn

Line up decimal points so tenths are under tenths and hundredths under hundredths. Add zeros if helpful. Add from right to left, regroup, and bring the decimal point straight down.

Worked example 1

Use the standard algorithm: 85.9 + 2.9. Show your regrouping or division steps.

1. Line up the decimal points. Add placeholder zeros so the numbers are 85.9 and 2.9.

2. Column 1 from the right: 9 + 9 = 18. Write 8 and carry 1 to the next column.

3. Column 2 from the right: 5 + 2 + 1 carried = 8. Write 8.

4. Column 3 from the right: 8 + 0 = 8. Write 8.

5. Bring the decimal point straight down, keeping 1 decimal place: 88.8. The simplified decimal answer is 88.8.

Answer: 88.8

Worked example 2

Use the standard algorithm: 4.06 + 0.15. Show your regrouping or division steps. Select one answer, then justify it with a model or calculation.
A. 521/100
B. 421/100
C. 321/100
D. 421/10

1. Line up decimal points so tenths are under tenths and hundredths under hundredths.

2. Align decimal points

3. 4.06 + 0.15 = 4.21.

Answer: B - 421/100

Day 001 | Your turn

Work in order: foundation → application → explanation. Show calculations and label units.

01 / Constructed response

Use the standard algorithm: 40.5 + 8.4. Show your regrouping or division steps.

02 / Constructed response

Use the standard algorithm: 84.7 + 2. Show your regrouping or division steps.

03 / Constructed response

Use the standard algorithm: 59.4 + 1.9. Show your regrouping or division steps.

04 / Constructed response

Use the standard algorithm: 1.67 + 2.5. Show your regrouping or division steps.

05 / Constructed response

Use the standard algorithm: 6.34 + 7.9. Show your regrouping or division steps.

06 / Constructed response

Use the standard algorithm: 4.93 + 6.7. Show your regrouping or division steps.

07 / Constructed response

Use the standard algorithm: 5.68 + 0.8. Show your regrouping or division steps.

08 / Multiple choice

Use the standard algorithm: 7.99 + 0.47. Show your regrouping or division steps. Select one answer, then justify it with a model or calculation.
A. 423/5
B. 423/50
C. 473/50
D. 373/50

09 / Multiple choice

Use the standard algorithm: 2.67 + 0.21. Show your regrouping or division steps. Select one answer, then justify it with a model or calculation.
A. 72/25
B. 144/5
C. 97/25
D. 47/25

10 / Constructed response

A runner walks 4.4 km in the morning and 0.71 km later. What is the total distance?

Day 001 | Unit 01 | Answer key

Positive Rational Numbers: Decimals and Division

Add Decimals with Place Value

Standards: 6.NS.B.3

Learning target: I can add decimals by aligning equal place values.

1. 48.9

Align decimal points; 40.5 + 8.4 = 48.9.

6.NS.B.3 | Constructed response

2. 86.7

Align decimal points; 84.7 + 2 = 86.7.

6.NS.B.3 | Constructed response

3. 61.3

Align decimal points; 59.4 + 1.9 = 61.3.

6.NS.B.3 | Constructed response

4. 4.17

Align decimal points; 1.67 + 2.5 = 4.17.

6.NS.B.3 | Constructed response

5. 14.24

Align decimal points; 6.34 + 7.9 = 14.24.

6.NS.B.3 | Constructed response

6. 11.63

Align decimal points; 4.93 + 6.7 = 11.63.

6.NS.B.3 | Constructed response

7. 6.48

Align decimal points; 5.68 + 0.8 = 6.48.

6.NS.B.3 | Constructed response

8. B - 423/50

Align decimal points; 7.99 + 0.47 = 8.46.

6.NS.B.3 | Multiple choice

9. A - 72/25

Align decimal points; 2.67 + 0.21 = 2.88.

6.NS.B.3 | Multiple choice

10. 5.11 km

Align decimal points; 4.4 + 0.71 = 5.11.

6.NS.B.3 | Constructed response
