Day 007 | Unit 01 | Teacher plan

Positive Rational Numbers: Decimals and Division

Divide by a Decimal

Standards: 6.NS.B.3

Learning target: I can divide by a decimal using an equivalent whole-number divisor.

enVision Topic 1: Use Positive Rational Numbers | Spectrum companion Chapter 1

0–5 minutes / Launch

Read the target. Ask for an estimate or a sketch before calculating. Connect the new idea to the previous lesson.

5–17 / Model

Use Worked Example 1, then Example 2. Ask students to name the next step and explain a choice. Multiply both dividend and divisor by the same power of 10 so the divisor is a whole number. Then use long division, adding zeros to the dividend as needed. Check by multiplication.

17–42 / Practice

Assign questions 1–10 in order. Use 1–3 for foundations, 4–7 for application, and 8–10 for state-format response and reasoning. The example button provides a separate question with a worked method.

42–50 / Discuss and check

Compare representations. Review a selected answer and a plausible error. Use question 10 as an exit discussion; ask students to check units, scale, or substitution.

Support and extension

Offer number lines, fraction strips, grid paper, or a table template as appropriate. Read multi-part directions one part at a time. For extension, ask for another representation or a counterexample.

Companion and state alignment

Use the matching skill in the edition you own. No unverified publisher page numbers are assigned. AASA references below identify related public sample items by standard and format; all course questions are original.

Positive Rational Numbers: Decimals and Division

Divide by a Decimal

Standards: 6.NS.B.3

Learning target: I can divide by a decimal using an equivalent whole-number divisor.

enVision Topic 1: Use Positive Rational Numbers | Spectrum companion Chapter 1

01 / Learn

Multiply both dividend and divisor by the same power of 10 so the divisor is a whole number. Then use long division, adding zeros to the dividend as needed. Check by multiplication.

Worked example 1

Use the standard algorithm: 46.8 ÷ 0.9. Show your regrouping or division steps.

1. Make the divisor a whole number. Multiply BOTH numbers by 10: 46.8 ÷ 0.9 = 468 ÷ 9. This keeps the quotient unchanged.

2. 9 goes into 46 5 times. Write 5; multiply 5 × 9 = 45; subtract 46 − 45 = 1.

3. Bring down the next digit, 8, to make 18. 9 goes into 18 2 times. Write 2; multiply 2 × 9 = 18; subtract 18 − 18 = 0.

4. Check using multiplication: 0.9 × 52 = 46.8. The quotient is 52.

Answer: 52

Worked example 2

Use the standard algorithm: 1.752 ÷ 0.24. Show your regrouping or division steps. Select one answer, then justify it with a model or calculation.
A. 73
B. 83/10
C. 63/10
D. 73/10

1. Multiply both dividend and divisor by the same power of 10 so the divisor is a whole number.

2. Multiply both numbers by 100: 175.2 ÷ 24 = 7.3.

3. Check: 0.24 × 7.3 = 1.752.

Answer: D - 73/10

Day 007 | Your turn

Work in order: foundation → application → explanation. Show calculations and label units.

01 / Constructed response

Use the standard algorithm: 55.3 ÷ 0.7. Show your regrouping or division steps.

02 / Constructed response

Use the standard algorithm: 15.4 ÷ 0.2. Show your regrouping or division steps.

03 / Constructed response

Use the standard algorithm: 21.5 ÷ 0.5. Show your regrouping or division steps.

04 / Constructed response

Use the standard algorithm: 6.45 ÷ 1.5. Show your regrouping or division steps.

05 / Constructed response

Use the standard algorithm: 20.4 ÷ 4. Show your regrouping or division steps.

06 / Constructed response

Use the standard algorithm: 8.64 ÷ 1.2. Show your regrouping or division steps.

07 / Constructed response

Use the standard algorithm: 2.16 ÷ 0.4. Show your regrouping or division steps.

08 / Multiple choice

Use the standard algorithm: 0.624 ÷ 0.24. Show your regrouping or division steps. Select one answer, then justify it with a model or calculation.

A. 8/5
B. 18/5
C. 13/5
D. 26

09 / Multiple choice

Use the standard algorithm: 3.456 ÷ 0.64. Show your regrouping or division steps. Select one answer, then justify it with a model or calculation.

A. 32/5
B. 22/5
C. 54
D. 27/5

10 / Constructed response

A container has 1.664 kg of seed. Each bag holds 0.32 kg. How many bags can be filled?
