Day 033 | Unit 03 | Teacher plan

Integers and Rational Numbers

Locate Integers on Number Lines

Standards: 6.NS.C.6c

Learning target: I can locate integers and negative fractions on a number line.

enVision Topic 2: Integers and Rational Numbers | Spectrum companion Chapter 4

0–5 minutes / Launch

Read the target. Ask for an estimate or a sketch before calculating. Connect the new idea to the previous lesson.

5–17 / Model

Use Worked Example 1, then Example 2. Ask students to name the next step and explain a choice. Mark zero and equally spaced whole-number ticks. Partition each interval into equal parts for the denominator. Negative values are left of zero on a horizontal line and below zero on a vertical line.

17–42 / Practice

Assign questions 1–10 in order. Use 1–3 for foundations, 4–7 for application, and 8–10 for state-format response and reasoning. The example button provides a separate question with a worked method.

42–50 / Discuss and check

Compare representations. Review a selected answer and a plausible error. Use question 10 as an exit discussion; ask students to check units, scale, or substitution.

Support and extension

Offer number lines, fraction strips, grid paper, or a table template as appropriate. Read multi-part directions one part at a time. For extension, ask for another representation or a counterexample.

Companion and state alignment

Use the matching skill in the edition you own. No unverified publisher page numbers are assigned. AASA references below identify related public sample items by standard and format; all course questions are original.

Day 033 | Unit 03 | Lesson

Integers and Rational Numbers

Locate Integers on Number Lines

Standards: 6.NS.C.6c

Learning target: I can locate integers and negative fractions on a number line.

enVision Topic 2: Integers and Rational Numbers | Spectrum companion Chapter 4

01 / Learn

Mark zero and equally spaced whole-number ticks. Partition each interval into equal parts for the denominator. Negative values are left of zero on a horizontal line and below zero on a vertical line.

Worked example 1

Draw a horizontal or vertical number line. Plot and label -4, 0, and 7.

1. Mark zero and equally spaced whole-number ticks.

2. Partition each interval into equal parts for the denominator.

3. Negative -4 is left of or below 0

4. 7 is right of or above 0.

5. Use equal intervals.

6. State the result in the form requested: -4 < 0 < 7; unit steps.

Answer: -4 < 0 < 7; unit steps

Worked example 2

On a number line, consecutive integer ticks are 1 unit apart. Plot -5/2, -2, and 0. Part A: name the leftmost point. Part B: give the midpoint between -3 and -2.

1. Mark zero and equally spaced whole-number ticks.

2. -5/2 = -2 - 1/2 lies halfway between -3 and -2, left of both -2 and 0.

Answer: Leftmost -5/2; midpoint -5/2

Day 033 | Your turn

Work in order: foundation → application → explanation. Show calculations and label units.

01 / Constructed response

Draw a horizontal or vertical number line. Plot and label -8, 0, and 7.

02 / Constructed response

Draw a horizontal or vertical number line. Plot and label -5, 0, and 5.

03 / Constructed response

Draw a horizontal or vertical number line. Plot and label -3, 0, and 2.

04 / Constructed response

Draw a horizontal or vertical number line. Plot and label -2, 0, and 3/4.

05 / Constructed response

Draw a horizontal or vertical number line. Plot and label -1/2, 0, and 3/4.

06 / Constructed response

Draw a horizontal or vertical number line. Plot and label -7/10, 0, and 3/10.

07 / Constructed response

Draw a horizontal or vertical number line. Plot and label -5/4, 0, and 1/2. Name the step size of your scale and explain the placement.

08 / Graphing and two-part response

On a number line, consecutive integer ticks are 1 unit apart. Plot -11/2, -5, and 0. Part A: name the leftmost point. Part B: give the midpoint between -6 and -5.

Choose and label an equal-interval scale.

09 / Graphing and two-part response

On a number line, consecutive integer ticks are 1 unit apart. Plot -15/2, -7, and 0. Part A: name the leftmost point. Part B: give the midpoint between -8 and -7.

Choose and label an equal-interval scale.

10 / Constructed response

Draw a horizontal or vertical number line. Plot and label -3/4, 0, and 1. Name the step size of your scale and explain the placement.

Day 033 | Unit 03 | Answer key

Integers and Rational Numbers

Locate Integers on Number Lines

Standards: 6.NS.C.6c

Learning target: I can locate integers and negative fractions on a number line.

1. -8 < 0 < 7; unit steps

Negative -8 is left of or below 0; 7 is right of or above 0. Use equal intervals.

6.NS.C.6c | Constructed response

2. -5 < 0 < 5; unit steps

Negative -5 is left of or below 0; 5 is right of or above 0. Use equal intervals.

6.NS.C.6c | Constructed response

3. -3 < 0 < 2; unit steps

Negative -3 is left of or below 0; 2 is right of or above 0. Use equal intervals.

6.NS.C.6c | Constructed response

4. -2 < 0 < 3/4; use steps of 1/4

Negative -2 is left of or below 0; 3/4 is right of or above 0. Use equal intervals.

6.NS.C.6c | Constructed response

5. -1/2 < 0 < 3/4; use steps of 1/4

Negative -1/2 is left of or below 0; 3/4 is right of or above 0. Use equal intervals.

6.NS.C.6c | Constructed response

6. -7/10 < 0 < 3/10; use steps of 1/10

Negative -7/10 is left of or below 0; 3/10 is right of or above 0. Use equal intervals.

6.NS.C.6c | Constructed response

7. -5/4 < 0 < 1/2; use steps of 1/4

Negative -5/4 is left of or below 0; 1/2 is right of or above 0. Use equal intervals.

6.NS.C.6c | Constructed response

8. Leftmost -11/2; midpoint -11/2

-11/2 = -5 - 1/2 lies halfway between -6 and -5, left of both -5 and 0.

6.NS.C.6c | Graphing and two-part response

9. Leftmost -15/2; midpoint -15/2

-15/2 = -7 - 1/2 lies halfway between -8 and -7, left of both -7 and 0.

6.NS.C.6c | Graphing and two-part response

10. -3/4 < 0 < 1; use steps of 1/4

Negative -3/4 is left of or below 0; 1 is right of or above 0. Use equal intervals.

6.NS.C.6c | Constructed response
