Day 049 | Unit 04 | Teacher plan

Numeric and Algebraic Expressions

Find Least Common Multiples

Standards: 6.NS.B.4b

Learning target: I can find the least common multiple of two numbers no greater than 12.

enVision Topic 3: Numeric and Algebraic Expressions | Spectrum companion Chapter 1

0–5 minutes / Launch

Read the target. Ask for an estimate or a sketch before calculating. Connect the new idea to the previous lesson.

5–17 / Model

Use Worked Example 1, then Example 2. Ask students to name the next step and explain a choice. List positive multiples of both numbers. The smallest shared multiple is the LCM. Repeating events that begin together next occur together after this many time units.

17–42 / Practice

Assign questions 1–10 in order. Use 1–3 for foundations, 4–7 for application, and 8–10 for state-format response and reasoning. The example button provides a separate question with a worked method.

42–50 / Discuss and check

Compare representations. Review a selected answer and a plausible error. Use question 10 as an exit discussion; ask students to check units, scale, or substitution.

Support and extension

Offer number lines, fraction strips, grid paper, or a table template as appropriate. Read multi-part directions one part at a time. For extension, ask for another representation or a counterexample.

Companion and state alignment

Use the matching skill in the edition you own. No unverified publisher page numbers are assigned. AASA references below identify related public sample items by standard and format; all course questions are original.

AASA sample item references: 17

Day 049 | Unit 04 | Lesson

Numeric and Algebraic Expressions

Find Least Common Multiples

Standards: 6.NS.B.4b

Learning target: I can find the least common multiple of two numbers no greater than 12.

enVision Topic 3: Numeric and Algebraic Expressions | Spectrum companion Chapter 1

01 / Learn

List positive multiples of both numbers. The smallest shared multiple is the LCM. Repeating events that begin together next occur together after this many time units.

Worked example 1

Find the LCM of 2 and 3 by listing multiples.

1. List positive multiples of both numbers.

2. The smallest shared multiple is the LCM.

3. The first positive multiple shared by 2 and 3 is 6.

4. State the result in the form requested: 6.

Answer: 6

Worked example 2

Two signals flash together now and then every 9 and 2 seconds. Select all true statements.
A. The next shared time is 19 seconds.
B. They next flash together after 18 seconds.
C. 36 seconds is also a time they flash together.
D. They next flash together after 1 seconds.

1. List positive multiples of both numbers.

2. List multiples or use prime factors.

3. The least shared positive multiple is 18

4. multiples of 18 are later shared times.

Answer: B, C - They next flash together after 18 seconds.; 36 seconds is also a time they flash together.

Day 049 | Your turn

Work in order: foundation → application → explanation. Show calculations and label units.

01 / Constructed response

Find the LCM of 2 and 4 by listing multiples.

02 / Constructed response

Find the LCM of 4 and 6 by listing multiples.

03 / Constructed response

Find the LCM of 2 and 6 by listing multiples.

04 / Constructed response

Find the LCM of 6 and 2 by listing multiples.

05 / Constructed response

Find the LCM of 9 and 11 by listing multiples.

06 / Constructed response

Find the LCM of 7 and 9 by listing multiples.

07 / Constructed response

Two lights flash together now, then every 8 and 2 seconds. When do they next flash together? Explain.

08 / Multiple select

Two signals flash together now and then every 6 and 8 seconds. Select all true statements.
A. The next shared time is 25 seconds.
B. They next flash together after 24 seconds.
C. They next flash together after 2 seconds.
D. 48 seconds is also a time they flash together.

09 / Multiple select

Two signals flash together now and then every 10 and 9 seconds. Select all true statements.
A. They next flash together after 90 seconds.
B. They next flash together after 1 seconds.
C. 180 seconds is also a time they flash together.
D. The next shared time is 91 seconds.

10 / Constructed response

Two lights flash together now, then every 12 and 5 seconds. When do they next flash together? Explain.

Day 049 | Unit 04 | Answer key

Numeric and Algebraic Expressions

Find Least Common Multiples

Standards: 6.NS.B.4b

Learning target: I can find the least common multiple of two numbers no greater than 12.

1. 4

The first positive multiple shared by 2 and 4 is 4.

6.NS.B.4b | Constructed response

2. 12

The first positive multiple shared by 4 and 6 is 12.

6.NS.B.4b | Constructed response

3. 6

The first positive multiple shared by 2 and 6 is 6.

6.NS.B.4b | Constructed response

4. 6

The first positive multiple shared by 6 and 2 is 6.

6.NS.B.4b | Constructed response

5. 99

The first positive multiple shared by 9 and 11 is 99.

6.NS.B.4b | Constructed response

6. 63

The first positive multiple shared by 7 and 9 is 63.

6.NS.B.4b | Constructed response

7. 8 seconds

The first positive multiple shared by 8 and 2 is 8.

6.NS.B.4b | Constructed response

8. B, D - They next flash together after 24 seconds.; 48 seconds is also a time they flash together.

List multiples or use prime factors. The least shared positive multiple is 24; multiples of 24 are later shared times.

6.NS.B.4b | Multiple select

9. A, C - They next flash together after 90 seconds.; 180 seconds is also a time they flash together.

List multiples or use prime factors. The least shared positive multiple is 90; multiples of 90 are later shared times.

6.NS.B.4b | Multiple select

10. 60 seconds

The first positive multiple shared by 12 and 5 is 60.

6.NS.B.4b | Constructed response
