Day 094 | Unit 07 | Teacher plan

Understand and Use Percent

Use Benchmark Percents

Standards: 6.RP.A.3c

Learning target: I can find the part when I know the percent and whole.

enVision Topic 6: Understand and Use Percent | Spectrum companion Chapter 3

0–5 minutes / Launch

Read the target. Ask for an estimate or a sketch before calculating. Connect the new idea to the previous lesson.

5–17 / Model

Use Worked Example 1, then Example 2. Ask students to name the next step and explain a choice. Use part = (percent/100) × whole. You may also find 10%, 5%, or 1% and combine equal pieces. Label the part in the same units as the whole.

17–42 / Practice

Assign questions 1–10 in order. Use 1–3 for foundations, 4–7 for application, and 8–10 for state-format response and reasoning. The example button provides a separate question with a worked method.

42–50 / Discuss and check

Compare representations. Review a selected answer and a plausible error. Use question 10 as an exit discussion; ask students to check units, scale, or substitution.

Support and extension

Offer number lines, fraction strips, grid paper, or a table template as appropriate. Read multi-part directions one part at a time. For extension, ask for another representation or a counterexample.

Companion and state alignment

Use the matching skill in the edition you own. No unverified publisher page numbers are assigned. AASA references below identify related public sample items by standard and format; all course questions are original.

Day 094 | Unit 07 | Lesson

Understand and Use Percent

Use Benchmark Percents

Standards: 6.RP.A.3c

Learning target: I can find the part when I know the percent and whole.

enVision Topic 6: Understand and Use Percent | Spectrum companion Chapter 3

01 / Learn

Use part = (percent/100) × whole. You may also find 10%, 5%, or 1% and combine equal pieces. Label the part in the same units as the whole.

Worked example 1

Find 25% of 40.

1. Use part = (percent/100) × whole.

2. You may also find 10%, 5%, or 1% and combine equal pieces.

3. 25/100 × 40 = 10.

4. State the result in the form requested: 10.

Answer: 10

Worked example 2

A school club has 40 members; 15% take part in a project. Part A: enter the number of participants. Part B: write an equation and explain whether the answer is greater or less than the whole.

1. Use part = (percent/100) × whole.

2. Rename 15% as 3/20.

3. Multiply by 40 to obtain 6.

4. Compare the rate with 1.

Answer: 6 participants; n = (15/100) × 40; less than the whole because the percent is below 100

Day 094 | Your turn

Work in order: foundation → application → explanation. Show calculations and label units.

01 / Constructed response

Find 10% of 200.

02 / Constructed response

Find 50% of 180.

03 / Constructed response

Find 20% of 200.

04 / Constructed response

Find 125% of 100.

05 / Constructed response

Find 12% of 140.

06 / Constructed response

Find 5% of 220.

07 / Constructed response

Find 40% of 100. Then explain a mental-math or fraction strategy that checks your answer.

08 / Numeric entry and explanation

A poster is enlarged to 125% of its original 100 cm width. Part A: enter the new width. Part B: explain why it exceeds the original.

09 / Numeric entry and equation

A school club has 80 members; 15% take part in a project. Part A: enter the number of participants. Part B: write an equation and explain whether the answer is greater or less than the whole.

10 / Constructed response

Find 125% of 100. Then explain a mental-math or fraction strategy that checks your answer.

Day 094 | Unit 07 | Answer key

Understand and Use Percent

Use Benchmark Percents

Standards: 6.RP.A.3c

Learning target: I can find the part when I know the percent and whole.

1. 20

10/100 × 200 = 20.

6.RP.A.3c | Constructed response

2. 90

50/100 × 180 = 90.

6.RP.A.3c | Constructed response

3. 40

20/100 × 200 = 40.

6.RP.A.3c | Constructed response

4. 125

125/100 × 100 = 125.

6.RP.A.3c | Constructed response

5. 84/5

12/100 × 140 = 84/5.

6.RP.A.3c | Constructed response

6. 11

5/100 × 220 = 11.

6.RP.A.3c | Constructed response

7. 40

40/100 × 100 = 40.

6.RP.A.3c | Constructed response

8. 125 cm

125/100 = 5/4 > 1. New width = 5/4 × 100 = 125 cm.

6.RP.A.3c | Numeric entry and explanation

9. 12 participants; n = (15/100) × 80; less than the whole because the percent is below 100

Rename 15% as 3/20. Multiply by 80 to obtain 12. Compare the rate with 1.

6.RP.A.3c | Numeric entry and equation

10. 125

125/100 × 100 = 125.

6.RP.A.3c | Constructed response
