Day 104 | Unit 07 | Teacher plan

Understand and Use Percent

Model a Percent Situation

Standards: 6.RP.A.3c

Learning target: I can model a Percent Situation, and explain and check my reasoning.

enVision Topic 6: Understand and Use Percent | Spectrum companion Chapter 3

0–5 minutes / Launch

Read the target. Ask for an estimate or a sketch before calculating. Connect the new idea to the previous lesson.

5–17 / Model

Use Worked Example 1, then Example 2. Ask students to name the next step and explain a choice. Use part = (percent/100) × whole. You may also find 10%, 5%, or 1% and combine equal pieces. Label the part in the same units as the whole. Write part = decimal rate × whole. Divide the part by the decimal rate to find the whole. Check by taking the stated percent of your answer. Divide the part by the whole, then multiply by 100. Keep the same units in part and whole. The percent can be above 100 if the part is larger than the reference whole.

17–42 / Practice

Assign questions 1–10 in order. Use 1–3 for foundations, 4–7 for application, and 8–10 for state-format response and reasoning. The example button provides a separate question with a worked method.

42–50 / Discuss and check

Compare representations. Review a selected answer and a plausible error. Use question 10 as an exit discussion; ask students to check units, scale, or substitution.

Support and extension

Offer number lines, fraction strips, grid paper, or a table template as appropriate. Read multi-part directions one part at a time. For extension, ask for another representation or a counterexample.

Companion and state alignment

Use the matching skill in the edition you own. No unverified publisher page numbers are assigned. AASA references below identify related public sample items by standard and format; all course questions are original.

Day 104 | Unit 07 | Lesson

Understand and Use Percent

Model a Percent Situation

Standards: 6.RP.A.3c

Learning target: I can model a Percent Situation, and explain and check my reasoning.

enVision Topic 6: Understand and Use Percent | Spectrum companion Chapter 3

01 / Learn

Use part = (percent/100) × whole. You may also find 10%, 5%, or 1% and combine equal pieces. Label the part in the same units as the whole. Write part = decimal rate × whole. Divide the part by the decimal rate to find the whole. Check by taking the stated percent of your answer. Divide the part by the whole, then multiply by 100. Keep the same units in part and whole. The percent can be above 100 if the part is larger than the reference whole.

Worked example 1

Find 20% of 160.

1. Use part = (percent/100) × whole.

2. You may also find 10%, 5%, or 1% and combine equal pieces.

3. 20/100 × 160 = 32.

4. State the result in the form requested: 32.

Answer: 32

Worked example 2

A quantity changes from a reference whole of 60 to a compared amount of 12. Part A: the compared amount is what percent of the reference whole? Part B: explain which number belongs in the denominator.

1. Divide the part by the whole, then multiply by 100.

2. Percent = (12 ÷ 60) × 100 = 20%.

3. The denominator is the reference whole, not automatically the larger number.

Answer: 20%; denominator 60

Day 104 | Your turn

Work in order: foundation → application → explanation. Show calculations and label units.

01 / Constructed response

Find 50% of 80.

02 / Constructed response

20% of a number is 16. Find the number and check.

03 / Constructed response

70 is what percent of 140?

04 / Constructed response

Find 30% of 40.

05 / Constructed response

125% of a number is 225. Find the number and check.

06 / Constructed response

60 is what percent of 200?

07 / Constructed response

Find 30% of 200. Then explain a mental-math or fraction strategy that checks your answer.

08 / Multiple select

9 is 15% of an unknown quantity w. Select all equations that find w.
A. (15/100)w = 9
B. w = 9 ÷ (15/100)
C. w = 9 × (15/100)
D. w = 9 + 15

09 / Numeric entry and explanation

A quantity changes from a reference whole of 40 to a compared amount of 16. Part A: the compared amount is what percent of the reference whole? Part B: explain which number belongs in the denominator.

10 / Constructed response

Find 15% of 60. Then explain a mental-math or fraction strategy that checks your answer.

Day 104 | Unit 07 | Answer key

Understand and Use Percent

Model a Percent Situation

Standards: 6.RP.A.3c

Learning target: I can model a Percent Situation, and explain and check my reasoning.

1. 40

50/100 × 80 = 40.

6.RP.A.3c | Constructed response

2. 80

Whole = 16 ÷ 1/5 = 80. Check 20% × 80 = 16.

6.RP.A.3c | Constructed response

3. 50%

70 ÷ 140 × 100 = 50%; the reference whole is 140.

6.RP.A.3c | Constructed response

4. 12

30/100 × 40 = 12.

6.RP.A.3c | Constructed response

5. 180

Whole = 225 ÷ 5/4 = 180. Check 125% × 180 = 225.

6.RP.A.3c | Constructed response

6. 30%

60 ÷ 200 × 100 = 30%; the reference whole is 200.

6.RP.A.3c | Constructed response

7. 60

30/100 × 200 = 60.

6.RP.A.3c | Constructed response

8. A, B - (15/100)w = 9; w = 9 ÷ (15/100)

The part is percent rate times whole. Divide 9 by 3/20; w = 60. Check by multiplication.

6.RP.A.3c | Multiple select

9. 40%; denominator 40

Percent = (16 ÷ 40) × 100 = 40%. The denominator is the reference whole, not automatically the larger number.

6.RP.A.3c | Numeric entry and explanation

10. 9

15/100 × 60 = 9.

6.RP.A.3c | Constructed response
